# Deal Engine for the Bootstrapped Economy

There are millions of private companies out there. But with trillions of dollars in dry powder looking for deals, it's increasingly competitive, and complex. There is very little information on bootstrapped companies, and the data is scattered across thousands of difficult-to-analyze sources.

*Founder-owned businesses represent a massive opportunity, but compared to investor-backed or public companies, data is scarce, scattered and messy.*

For investors targeting founder-owned businesses, SourceScrub is the leading authority and data service for scaling deal flow. We help you find, research and connect with more opportunities by providing clear signal on this difficult-to-read part of the market.

SourceScrub offers more complete and accurate data on private growth companies, along with technology to quickly map, prioritize and engage target companies. As a result, SourceScrub clients use their data advantage to outperform their peers, completing 55% more deals and returning more than 8% points higher IRR.
